Baku City, Baku Ekonomic Zone

I'm a backend web developer with a strong focus on Node.js and MongoDB. I specialize in building and optimizing server-side applications that are both scalable and high-performing. I'm good at solving complex technical challenges and continuously improving application performance. Let's connect and explore how we can collaborate on exciting projects!

Work Experience

Co-founder, Ceo
Jun 2023 - Apr 2024

Syntheyesis | Baku, Baku Ekonomic Zone, Azerbaijan

At Syntheyesis, my experience at backend development, artificial intelligence, teamwork and leadership increased. I wrote full-stack code of web platform and desktop application. The main goal of project was helping paralyzed people control everything with eyes. The main challenging part was ai part of this project, because that was my first time building project includes ai. At the end, with my team, we won 2nd place at "Sabahın Alimləri XIII Respublika Müsabiqəsi".

Co-founder, CTO
Jun 2022 - Dec 2023

ARkod.az | Azerbaijan

ARkod.az was a good leadership experience for me. This technology can be used in many industries. We created a 3d environment with augmented reality to solve some global problems. At the end, we took 3rd place at "Sabahın Alimləri" XII Republican Science Fair.

Azerbaijan community leader
Jun 2022 - Sep 2023

Let'sMOD | Azerbaijan
